

SILICONE BALLS

FULL RANGE
SHOTGUN
AMMUNITION

Less lethal ammunition designed for short range riot control or incapacitation of individuals. The material of ammunition makes it powerful in medium range but remains less-lethal also in short distances. The ammunition is bright green colour-coded for easier identification from lethal ammunition. Projectiles are made of silicone that retains its physical features in long run, therefore allows longer shelf life compared to classical rubber ammunition.

PERFORMANCE CHARACTERISTICS

- ◆ Short range less-lethal ammunition
- ◆ Colour coded - bright green, allows easy identification
- ◆ Soft and firm material
- ◆ High expansion on target, decreases the risk of penetration
- ◆ Retains physical properties, doesn't harden on shelf

POTENTIAL TARGETS AND APPLICATION

- ◆ Riot control
- ◆ Incapacitation of individuals
- ◆ Prison guarding, riots in prison
- ◆ Animal scaring and control
- ◆ Guarding of private property

WEAPON COMPATIBILITY

Suitable for use in any type of 12 gauge pump-action shotgun

12/70

RIOT CONTROL

ATTENTION:

FOR OPTIMAL USE OF RIOT CONTROL AMMUNITION IT IS IMPORTANT TO CHOOSE THE RIGHT TYPE OF ROUND DEPENDING ON EACH SITUATION. THE AIMING AND SHOT PLACEMENT IS IMPORTANT TO AVOID UNNECESSARY INJURIES OR DEATH. AVOID AIMING ON VITAL PARTS OF BODY – HEAD, NECK, THORAX OR GROIN. AIMING ON ABDOMEN OR CHEST IS ALLOWED ONLY IN CRITICAL SITUATIONS WHERE COMBAT AMMUNITION WOULD BE USED.
